State of Wisconsin
Department of Administration

July 21, 1987

To the Honorable the Legislature

Pursuant to 1985 Wisconsin Act 296, I am today filing the 1986-87 Progress Report of the Wisconsin Acid Deposition Research Council.

The Wisconsin Acid Deposition Research Council was created by 1985 Wisconsin Act 296, and is attached to the Department of Administration. The Council was empanelled in May of 1986. Members of the Research Council represent the industrial sector, electric utilities, environmental organizations, academia, and state governmental agencies.

The 1986-87 Research Council Progress Report, A Course of Action to Assess Acid Rain in Wisconsin,

summarizes the Research Council's recommendations on acid deposition research and monitoring priorities, funding levels, and sources of funding. The Council plans to examine further alternate research funding sources and to issue an addendum in September, 1987.

It is hoped that these recommendations, the consensus product of over a year's intensive deliberations, will lead to a cost-effective and valuable research and monitoring program.

A strong research and monitoring program is vital for assessing the potential effects of acid deposition on sensitive resources in Wisconsin. These resources -- our lakes, streams, historical structures, artistic treasures, sports fishery, scenic vistas, woodland forests, and health of our citizens -- form an integral part of all that constitutes the quality of life in Wisconsin.

Should you have additional questions, or wish to discuss this report in further detail, please do not hesitate to contact me.

Sincerely,
Scott Neitzel
Chair

SENATE CLEARINGHOUSE ORDERS
