Description

Requiring local governmental units to consider relationships with drainage districts in the preparation of comprehensive plans, requiring local governments to provide notice to drainage districts regarding proposals that affect drainage districts, and requiring sellers of real property to disclose the location of property within drainage districts

Assumptions Used in Arriving at Fiscal Estimate

The requirement for governmental units to consider drainage districts in their comprehensive plans already exists but has been overlooked because it has not been explicitly listed in the existing statutes. The cost of adding the disclosure would not be to local government.

Long-Range Fiscal Implications

none
