<b>Description</b> Creating a refundable individual income tax credit for property taxes paid on a principal dwelling that is								
destroyed by a natural or man-made disaster and making an appropriation								

#### **Assumptions Used in Arriving at Fiscal Estimate**

This bill creates a refundable individual income tax credit that is equal to the amount of property taxes that an individual paid in the taxable year on the claimant's principal dwelling that was destroyed by fire, flood, or other natural or man-made disaster. The credit does not apply if the dwelling is destroyed by the claimant's negligent or intentional act.

According to the U.S. Census Bureau, there were approximately 1.57 million owner-occupied housing units in Wisconsin in the 2006 to 2008 period. According to the Insurance Information Institute, approximately 4.07 annual homeowner's insurance claims were made per 100 policies between 2003 and 2007 related to fire, ligtning, debris removal, wind, hail, water damage, and freezing. Data are not available on the share of these incidences that resulted in the claimant's dwelling being destroyed. Similarly, data are not available for uninsured homeowners' losses. As a result, the fiscal effect of the bill is unknown.

For illustrative purposes, however, if it was assumed that disasters occurred at the same rate on insured and uninsured homes and one percent of homeowner's insurance claims were from disasters that destroyed the dwelling, approximately 639 homes would have been destroyed on average per year (1.57 million x 4.07% x 1%) in Wisconsin. Using Department of Revenue data, the average property tax paid by Wisconsin residents on an improved residential parcel in 2008 was \$3,047. Therefore, the fiscal effect of this bill would have been a cost increase of \$1.95 million annually (639 dwellings x \$3,047).

Property losses due to natural disasters are likely to vary dramatically from year to year. To the extent that this occurs, the fiscal effect of the bill is also likely to vary from year to year.

#### **Long-Range Fiscal Implications**
