## Fiscal Estimate Narratives

DOJ 11/25/2009

LRB Number <b>09-2424/1</b>	Introduction Number <b>SB-174</b>	Estimate Type <b>Original</b>
<b>Description</b> Creating a microstamping requirement for certain handguns, certification of compliance with the microstamping requirement, requiring the exercise of rule-making authority, and providing penalties		

### Assumptions Used in Arriving at Fiscal Estimate

2009 Senate Bill 174 creates Chapter 175.36, relating to semiautomatic handgun identification. Under Ch. 175.36 (6), the Department of Justice shall promulgate rules specifying the manner in which a manufacturer must certify that a semiautomatic handgun produces microstamps and identifying the conditions necessary for a manufacturer of firearms or ammunition to disclosed to a law enforcement agency the make, model, and serial number of a semiautomatic handgun.

The department anticipates being able to absorb within its existing budget the costs associated with completing the rule making process required under Senate Bill 174.

Individual characters microstamped onto shell casings are very small, measuring only 1 or 2 millimeters in diameter. Also, the quality of the characters microstamped on shell casings may deteriorate over time as the stamping mechanism experiences more use. These two factors may combine to make it difficult to accurately and/or definitively identify all characters stamped on shell casings without the assistance of specialized magnification equipment. As a result, local law enforcement agencies may decide to send microstamped shell casings to DOJ's crime labs for positive identification. If the number of requests for positive identification is significant, DOJ will not be able to absorb the increased workload and will require additional resources.

### Long-Range Fiscal Implications
