LRB Number	09-0954/2	Introduction Number	SB-459	Estimate Type	Original
Description Storing certain flammable, combustible, and hazardous liquids and maintaining an inventory of storage tanks containing petroleum products and certain hazardous substances (suggested as remedial legislation by the Department of Commerce)					

Assumptions Used in Arriving at Fiscal Estimate

2009 SB 459 makes changes to current law regarding storing certain flammable combustible, and hazardous liquids and maintaining an inventory of storage tanks containing petroleum products and certain hazardous substances.

Current law defines combustible liquid as having a flash point above 100 degrees and below 200 degrees. 2009 SB 459 aligns the definition of combustible liquid with federal law which does not include an upper temperature limit for liquids that are regulated as combustible.

Federal law requires regulation of tanks less than 110 gallons. 2009 SB 459 changes the statutory requirement of regulating tanks greater than 5,000 gallons to regulating tanks greater than 110 gallons to be consistent with federal law and reflect the Department's current practice.

2009 SB 459 also requires the certification of persons who install, test or maintain cathodic protection systems for tank systems. This change will make state law consistent with federal law and with recent rules promulgated by the Department.

2009 SB 459 makes minor changes in the statutes, and will not have a fiscal impact on the Department.

Long-Range Fiscal Implications
