## Fiscal Estimate Narratives

DPI 4/15/2010

LRB Number	09-3381/1	Introduction Number	SB-686	Estimate Type	Original
<b>Description</b> Providing instruction in cardiopulmonary resuscitation, cardiocerebral resuscitation, and the use of an automated external defibrillator to high school pupils					

### Assumptions Used in Arriving at Fiscal Estimate

This bill requires operators of high school grades, including school boards, operators of independent charter schools, and the governing bodies of private schools, to offer enrolled high school students instruction in cardiopulmonary resuscitation (CPR), cardiocerebral resuscitation (hands only) and the use of an automated external defibrillator. The instruction must be based on an instructional program established by the American Red Cross or the American Heart Association or on other nationally recognized evidence-based guidelines.

For purposes of this estimate, the department assumes "offer" to mean "provide access to" such instruction, and not that schools must provide such instruction to each student.

State Fiscal Effect: Department staff may be asked to provide instructional assistance to local school districts to help them comply with the law. In addition, the department may send a bulletin to school districts informing them of the change in the law. It is assumed that the cost of performing these tasks could be absorbed by the department.

Local Fiscal Effect: It is unknown how many school districts may already offer the required instruction and whether such instruction is developed by the American Red Cross, the American Heart Association or other nationally recognized, evidence-based guideline. Curriculum meeting these requirements is available; however, the cost of purchasing such curriculum is unknown. Some districts may have an additional cost to either supplement existing curriculum or to purchase new curriculum. On the other hand, some schools may already incorporate the required instruction in a high school health class. Therefore, the local fiscal effect will vary from district to district and is indeterminate.

### Long-Range Fiscal Implications
