Petition for Moratorium on Industrial Wind Turbine Projects in Wisconsin

We, the undersigned, petition the Wisconsin Public Service Commission (PSC) to place an immediate moratorium on industrial wind energy developments throughout the state of Wisconsin to allow time to study the various issues surrounding this technology, some of which may have negative impacts on local communities.

We are concerned about the siting and development of industrial wind turbines throughout the state on the following grounds:

- Numerous documented human health issues
- Noise and shadow flicker from the wind turbines
- Interference with television, radio, Internet and cell phone signals
- Potential detrimental impact on farm animals, wildlife and domesticated animals
- The project's expected impact on property values (studies show 26% to 43% loss of property values for bordering proximity properties)
- Wind turbines provide very expensive, inefficient and unreliable power

Thank you for your consideration of this extremely urgent matter.

Petition for Moratorium on Industrial Wind Turbine Projects in Wisconsin

We, the undersigned, petition the Wisconsin Public Service Commission (PSC) to place an immediate moratorium on industrial wind energy developments throughout the state of Wisconsin to allow time to study the various issues surrounding this technology, some of which may have negative impacts on local communities.

We are concerned about the siting and development of industrial wind turbines throughout the state on the following grounds:

- Numerous documented human health issues
- Noise and shadow flicker from the wind turbines
- Interference with television, radio, Internet and cell phone signals
- Potential detrimental impact on farm animals, wildlife and domesticated animals
- The project's expected impact on property values (studies show 26% to 43% loss of property values for bordering proximity properties)
- Wind turbines provide very expensive, inefficient and unreliable power

Thank you for your consideration of this extremely urgent matter.

Petition for Moratorium on Industrial Wind Turbine Projects in Wisconsin

We, the undersigned, petition the Wisconsin Public Service Commission (PSC) to place an immediate moratorium on industrial wind energy developments throughout the state of Wisconsin to allow time to study the various issues surrounding this technology, some of which may have negative impacts on local communities.

We are concerned about the siting and development of industrial wind turbines throughout the state on the following grounds:

- Numerous documented human health issues
- Noise and shadow flicker from the wind turbines
- Interference with television, radio, Internet and cell phone signals
- Potential detrimental impact on farm animals, wildlife and domesticated animals
- The project's expected impact on property values (studies show 26% to 43% loss of property values for bordering proximity properties)
- Wind turbines provide very expensive, inefficient and unreliable power

Thank you for your consideration of this extremely urgent matter.
