Fiscal Estimate Narratives

DATCP 2/7/2012

LRB Number 11-3765/1	Introduction Number SB-407	Estimate Type Original
Description Zinc air button cell batteries and providing penalties		

Assumptions Used in Arriving at Fiscal Estimate

This bill bans the retail sale of a zinc air button cell battery, unless the manufacturer certifies with the department that the battery does not contain mercury that was intentionally introduced. The bill directs the department to compile a list of all batteries that receive certification and make the list available to the public. It also imposes forfeitures for violating the law and for submitting a fraudulent certification. The ban would begin after January 1, 2013.

The department anticipates that the cost of implementing this bill would be minimal and that it can be absorbed. The department would maintain the certification list and make it available to the public. It does not expect a significant increase in enforcement activity resulting from regulation of zinc air button cell batteries.

Long-Range Fiscal Implications
