| Description Student loans, the individual income tax subtract modification for tuition and student fees, creating an authority, to be known as the Wisconsin Student Loan Refinancing Authority, granting rule-making authority, and making an appropriation | | | | | |

Assumptions Used in Arriving at Fiscal Estimate

Under current law, an individual may claim an income tax deduction for certain amounts paid during the year for tuition and mandatory student fees. For tax year 2013 a deduction of up to \$6,943 per student is allowed for tuition that is paid to any university, college, technical college or a school approved by the Educational Approval Board that is located in Wisconsin. Tuition paid to a public vocational school or public institution of higher education in Minnesota under the Minnesota-Wisconsin reciprocity agreement also qualifies for the deduction.

Eligible expenses include tuition for the education of the claimant, the claimant's spouse, and his or her dependents. The maximum deduction amount is phased out in specified ranges of federal adjusted gross income (FAGI): between \$50,850 and \$61,020 for single and head of household filers, \$81,350 and \$101,690 for married joint filers, and \$40,680 and \$50,850 for married separate filers. The phase-out ranges are indexed for inflation and the maximum deduction per student is based on the amount of tuition charged by the University of Wisconsin System at four-year institutions.

Wisconsin also conforms to current federal law, which allows that individuals who have taken out loans on behalf of themselves, their spouse or their dependents to pay for the cost of attending an eligible educational institution may deduct the interest they pay on these loans. The maximum allowable deduction is \$2,500. For 2013, the deduction amount is reduced for single and head of household filers when modified FAGI is more than \$60,000 and is eliminated when modified FAGI exceeds \$75,000; for married joint filers the deduction is phased out between \$120,000 and \$150,000 of modified FAGI. Married separate filers and those filers claimed as dependents on another individual's return may not claim the deduction.

The bill makes a number of changes to the law relating to student loans. As the bill pertains to the individual income tax, it eliminates the income thresholds for the current law tuition deduction. It also expands the definition of tuition expenses to include any amount paid by a claimant during the year on a student loan (interest and principle). Expanding the definition of tuition expenses to include student loans will allow claimants to deduct the same tuition payment multiple times, to the extent that tuition is paid using the proceeds of a student loan. The tuition payment may be deducted once when it is paid, and again when the student loan is repaid. Student loan interest payments may also be deducted once under current law, and again under the bill.

Based on simulations using the 2010 Individual Income Tax Model, eliminating the income phase-out for the tuition deduction is expected to reduce revenue by approximately \$4.7 million in fiscal year 2014 and \$31.6 million annually beginning in fiscal year 2015. Expanding the deduction to include student loan principle and interest payments is expected to further reduce revenue by approximately \$7.6 million in fiscal year 2014 and \$51.1 million annually, beginning in fiscal year 2015. The combined fiscal effect of the bill is an estimated revenue reduction of \$12.3 million in fiscal year 2014 and \$82.7 million annually beginning in fiscal year 2015.

Long-Range Fiscal Implications

To the extent that education cost increases continue to outpace broader inflation measures, the annual cost of the bill is also expected to increase faster than inflation over time.
