

Fiscal Estimate Narratives

DPI 5/9/2017

LRB Number	17-0470/1	Introduction Number	SB-195	Estimate Type	Original
Description school board referendums to exceed revenue limit applicable to a school district					

Assumptions Used in Arriving at Fiscal Estimate

The bill modifies school boards' authority to use the referendum process. Specifically, the bill eliminates the recurring (base-building) option for an operating referendum, meaning that a school board could not ask for authority to raise revenue authority on a permanent basis. The bill also limits a school board to a maximum of five consecutive years for a multi-year, non-recurring referendum. This means a board could ask for additional revenue authority for each of five years, but the additional authority would not remain in the district's base revenue permanently. Finally, for districts that had already obtained previous approval for a permanent revenue authority increase (via recurring referendum), the bill eliminate that referendum-derived revenue authority from the district's base, beginning in year six after the bill becomes effective.

Based on the history of approved referenda maintained by the Department of Public Instruction (DPI), the total, annualized amount of previously approved recurring referenda (those approved prior to 6/30/2017) is \$178.5 million, for 130 districts. The \$178.5 million represents referenda approved from September 10, 1996 through April 4, 2017.

Local Fiscal Impact

In school districts in which a recurring (base-building) referendum had been approved through April 4, 2017 (proxy for the "prior to the bill's effective date" included in the bill), effective in year six after passage of the bill, those districts would lose whatever revenue authority they had gained via the referendum (total of \$178.5 M in revenue authority for 130 school districts). If not recovered via a new, non-recurring referendum (at five consecutive years, maximum), those districts would simply lose the revenue authority; that is, actual spending capacity. In order to maintain the revenue authority level, a board would have to return to voters at least every five years to request the revenue authority. The annualized revenue authority amounts due to previously approved recurring referenda range from \$19,250 to \$26 million, with an average of \$ \$973,976.

To the extent that a school district does not recover the revenue authority, the amount that could be spent from general aids and local tax levy would decrease. Beyond the impacts on those districts' operating budgets, the district's shared costs for purposes of calculating equalization aid would decrease, the result of which would be a redistribution of state aid under the state's equalization aid formula.

State: none.

Long-Range Fiscal Implications

District	District Name	Vote Date	Total Amount	Type	Yes	No	Result	Brief Description
3428	Melrose-Mindoro	09/10/1996	\$ 125,000	RR	314	261	Passed	revenue limit
