Description model academic standards related to climate change, developing climate change curriculum resources, and making an appropriation					

Assumptions Used in Arriving at Fiscal Estimate

This bill grants the Department of Public Instruction's state superintendent the authority to adopt model academic standards related to climate change.

If the state superintendent adopts model climate change standards, they must incorporate:

- A) An understanding of climate,
- B) The interconnected nature of climate change,
- C) The potential local and global impacts of climate change, and
- D) the individual and societal actions that may mitigate the harmful effects of climate change.

DPI is to provide grants or contracts with state agencies or nonprofit organizations in order to assist in the development of interdisciplinary curriculum for elementary, middle, and high school.

DPI must also support school boards in the development of climate change curriculum and curriculum resources.

DPI is to receive 1.0 FTE GPR project position for the duration of two years. The position would start no earlier than January 1, 2024.

Starting in 2023-24, DPI will receive an increase of GPR by \$200,000 to fund the position and grants. In 2024-25 DPI will receive \$300,000 increase to fund the position and the grants.

Long-Range Fiscal Implications

The DPI project position is scheduled to last for two years and be funded with GPR. This will not increase long-range fiscal costs. However, there is no specific sunset date for the general increase of funding in 2024-25, and it is assumed it will raise base GPR budget by \$300,000.
