Assumptions Used in Arriving at Fiscal Estimate				
Content This rule consolidates s. ATCP 10 (Animal Disease) and ATCP 11 (Animal Movement) into a single chapter s. ATCP 10 (Animal Disease, Animal Identification and Movement). Additionally, it makes technical changes to s. ATCP 10 and 12, modifies the Johne's program, the aquaculture program, requires official identification of sheep and goats for intrastate movements, and provides more cost-effective disease monitoring options for small poultry producers.				
Fiscal Effect This rule creates a \$50 fee for a fish import permit. DATCP estimates that this fee will generate approximately \$5,000 in program revenue.				
This rule requires DATCP, for the first time, to review and approve health certificates related to fish imports and the introduction of fish to waters of the state. (Current rules require health certificates but do not require DATCP approval). This increased workload will have an associated cost of \$5,400 in staff salary and administrative expenses. DATCP will absorb this workload with current staff. Revenues generated will be used to offset additional costs to the program.				
This rule will allow poultry flocks to obtain a testing status other than participation in the national poultry improvement plan. Flock owners will submit proof of adequate testing and other information to the department for review and approval to receive their status. DATCP will incur costs for staff and administrative expenses. However, DATCP will absorb these costs with existing staff and appropriations.				
Long - Range Fiscal Implications
