**Assumptions Used in Arriving at Fiscal Estimate**

This proposed administrative rule change amends VA 2.01 (2) (a), VA 2.01 (2) (b), VA 2.01 (3) (b) and VA 2.01 (3) (c) relating to the assistance to needy veterans grants (ANVG).

The proposed administrative rule establishes the following provisions governing subsistence aid grants (SAG) under the ANVG program:

- Allowing applicants to apply for subsistence aid at any point in the 90 day period following loss of income from an illness, injury or natural disaster.
- No subsistence aid will be granted for any period prior to the date the application for subsistence aid is received.

Under current law, subsistence aid may be granted within a 30 day period following the loss of income due to illness, injury, or a natural disaster.

The proposed rule amendment will show a decrease in the department's denial rate of the grant for eligible veterans. The only data available to estimate the fiscal effect are the number of grant applications denied in FY08 because the veteran failed to submit an application within the required 30-day time limit. Available data for shows that 40 of the 127 SAG applications disapproved in FY08 were denied for not meeting the 30-day limit. The average SAG grant in FY08 was \$1,997. Consequently, the proposed rule change would increase projected SAG expenditures by at least \$79,900 (40 x \$1,997).

The base level funding for SAGs is \$172,000 per fiscal year. A total of \$119,800 in SAG's were approved in FY08. The increased funding needed to cover the estimated 40 additional SAG's is \$27,700 (\$199,700 – \$172,000).

There is no data on the number of veterans who did not submit an application because they were aware of the 30-day limit and knew that their application would be disapproved because they had not applied within the 30-day limit. As a result, it is anticipated that the number of additional applications received due to increasing the limit to 90-days would be greater than the 40 applications that were submitted and disapproved. Unfortunately, there is no way of estimating what that number will be.

An additional fiscal effect of the proposed rule changes is that the amount of the SAG grant would be prorated over the 90-day period since no subsistence aid would be granted for any period prior to the date the application for subsistence aid is received. The effect of this provision, at least over the short-term, would be to lower SAG expenditures. However, the data needed to estimate that amount of cost savings does not exist.

Because it is not possible to estimate all of the cost impacts of the proposed rule changes, the fiscal estimate is indeterminate. However, based on the cost of the 40 known SAG applications that would have been paid under the proposed rule changes, it is estimated that SAG funding should be increased by \$48,200 in FY10 and \$59,200 in FY11. The table below shows how the dollar amounts for FY10 and FY11 were calculated.

Fiscal Year	Estimated Demand*	Base Level Funding	Additional Funding Needed**
FY08	\$199,900	\$172,000	\$27,900
FY09	\$209,700	\$172,000	\$37,700
FY10	\$220,200	\$172,000	\$48,200
FY11	\$231,200	\$172,000	\$59,200

\*Assumes a 5% inflation factor for each fiscal year after FY08.

\*\*Assumes that the proposed rule changes would become effective at the start of FY10.
