### ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

Wisconsin, taxpayers that currently file Wisconsin returns and do business in multiple states will use the new nexus standard to determine if they have nexus in another state. If a taxpayer determines they would have nexus in a state where they are currently throwing back sales to their Wisconsin sales factor, those sales would no longer be thrown back and the taxpayer's sales factor would be lower, resulting in a reduction in income taxable to Wisconsin.

15. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

Under current Tax 2.82, nexus is created in Wisconsin based on a list of activities that are performed "regularly" or that are described as "usual or frequent." This proposed rule clarifies the level of activity that qualifies as "regularly" generally means 15 or more days of activity.

16. Long Range Implications of Implementing the Rule

Out-of-state businesses may incur costs to file a Wisconsin income/franchise tax return if they are considered to have nexus because of the rule changes.

17. Compare With Approaches Being Used by Federal Government

Federal constitutional provisions: Article I, Section 8 of the U.S. Constitution grants congress the power to regulate commerce with foreign nations and among the several states. States are prohibited from levying a tax which imposes a burden on interstate or foreign commerce.

Federal Public Law 86-272: Under Public Law 86-272, a state may not impose its franchise or income tax on a business selling tangible personal property, if the only activity of that business is the solicitation of orders by its salesperson or representative which orders are sent outside the state for approval or rejection, and are filled by delivery from a point out side the state. The activity must be limited to solicitation. If there is any activity which exceeds solicitation, the immunity from taxation under Public Law 86-272 is lost. This law does not prohibit states from imposing franchise/income tax on out-of-state businesses that sell services, real estate, or intangibles into a state.

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

Most states do not have laws or regulations that establish a clear threshold or standard of activities that create ne xus. Nexus is often determined on a case-by-case basis.

Michigan – A corporation has nexus with Michigan for corporate income tax purposes if that corporation has a physical presence in the state for a period of more than one day during the tax year, if the corporation actively solicits sales in the state and has gross receipts of \$350,000 or more sourced to the state, or if the corporation has an ownership interest or beneficial interest in a flow-through entity, directly, or indirectly through one or more flow-through entities, that has substantial nexus in the state.

Illinois: – The question of nexus in Illinois is highly fact-dependent. Tax is imposed on every corporation for the privilege of earning or receiving income in the state. The only threshold imposed relates to sample or display rooms. Maintaining a sample or display room in excess of 14 days will create income tax nexus for an out-of-state business.

Minnesota – There is no standard or threshold that would create nexus in Minnesota. Tax is imposed on every entity that obtains or regularly solicits trade or business from within the state.

Under current Tax 2.82, nexus is created in Wisconsin based on a list of activities that are performed "regularly" or that are described as "usual or frequent." This proposed rule clarifies the level of activity that qualifies as "regularly" generally means 15 or more days of activity.  The proposed rule would affect revenue in two offsetting ways. First, the rule would create nexus and a filing requirement for taxpayers that currently do not have a requirement to file a return and pay tax to WI. This would raise corporate income and franchise taxes and individual income taxes (via income from pass-through entities).  The gain in revenue from creating nexus and a filing requirement will likely be offset, in whole or in part, by a loss of revenue that results from a reduction in throwback sales. Just as nexus is created for taxpayers who currently are not filing returns in Wisconsin, taxpayers that currently file Wisconsin returns and do business in multiple states will use the new nexus standard to determine if they have nexus in another state. If a taxpayer determines they would have nexus in a state where they are currently throwing back sales to their Wisconsin sales factor, those sales would no longer be thrown back and the taxpayer's sales factor would be lower, resulting in a reduction in income taxable to Wisconsin.  While specific taxpayers may experience either an increase or decrease in tax liability, it is anticipated that the overall net change in tax revenue would be minimal.
