ADMINISTRATIVE RULES

Fiscal Estimate & Economic Impact Analysis

17. Compare With Approaches Being Used by Federal Government

States possess inherent authority to manage the wildlife resources located within their boundaries, except insofar as preempted by federal treaties and laws, including regulations established in the Federal Register. None of these rule changes violate or conflict with the provisions established in the Federal Code of Regulations.

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

These rule change proposals do not represent significant policy changes and do not differ significantly from surrounding states. All surrounding states have regulations and rules in place for the management and recreational use of wild game and use of department properties that are established based on needs that are unique to that state's resources and public desires.
