STATE OF WISCONSIN NATURAL RESOURCES BOARD

.....  
IN THE MATTER of creating Chapter NR 151 .  
of the Wisconsin Administrative Code . ORDER NUMBER SW-29-73  
pertaining to Solid Waste Disposal .  
.....

ORDER OF THE STATE OF WISCONSIN NATURAL RESOURCES BOARD

CREATING RULES PURSUANT TO CHAPTER 227

Pursuant to authority vested in the State of Wisconsin Natural Resources Board by sections 144.31, 144.43, 144.44 and Chapter 227, Wisconsin Statutes, the Natural Resources Board hereby creates rules as follows:

SECTION 1. NR 151.02 (26) of the Wisconsin Administrative Code is created to read:

(26) SCRAP METAL PROCESSING FACILITY. A scrap metal processing facility is a solid waste disposal operation at which metallic salvageable material is separated, shredded, compressed, baled, sheared, or further processed to make it suitable for use as a metal or raw material.

SECTION 2. NR 151.20 of the Wisconsin Administrative Code is created to read:

NR 151.20 SOLID WASTE DISPOSAL OPERATION - SCRAP METAL PROCESSING FACILITY.

(1) A scrap metal processing facility shall not be operated until it has been licensed by the department.

(2) Prior to June 1 of each year, completed relicensing applications together with an annual fee of \$50.00 shall be submitted for each scrap metal processing facility to the appropriate district office. License applications for a new scrap metal processing facility will be accepted at any time. The license is transferrable to another scrap metal processing facility of the license holder but the fee is not refundable or proratable.

(3) A scrap metal processing facility shall not be established until a minimum of three sets of plans and specifications submitted to the department have been approved in writing by the department. An initial plan review fee of \$75.00 in addition to the annual license fee shall be submitted for each newly established or previously unlicensed scrap metal processing facility. The fee is not refundable. The plans and specifications shall include the following:

(a) Map or aerial photograph of the area showing land use and zoning within 1/4 mile of the solid waste disposal site. The map or aerial photograph shall be of sufficient scale to show all homes, industrial buildings, wells, watercourses, dry runs, rock outcroppings, roads, and other applicable details. All such details plus the topography shall be identified and indicated on the map or aerial photograph.

(b) A plot of the site showing dimensions, elevations, proposed layout of operation, access road, means for limiting access, and method of screening. The scale should not be greater than 200 feet per inch.

(c) A report indicating the following:

1. The types and quantities of material to be brought to the facility.
2. The types and capacities of equipment to be provided at the facility for processing purposes.
3. Types and approximate quantities of that portion of the solid waste intended for delivery to a department licensed solid waste disposal operation.
4. Description of means for handling that portion of solid waste intended for delivery to a department licensed solid waste disposal operation.
5. Operating procedures which detail how compliance will be achieved with NR 151.20 (4).

6. Names and license numbers of any collecting and transporting services which transport solid waste from the processing facility to a department licensed solid waste disposal operation.

7. Name and license number of solid waste disposal operation to which solid waste from the facility will be taken.

8. Persons responsible for the actual operation and maintenance of the facility.

(4) Any person who maintains or operates a scrap metal processing facility or permits use of property for such shall maintain and operate the facility in conformance with the following practices unless otherwise specified by the department in granting the required license:

(a) A sign acceptable to the department shall be posted at the entrance to the facility which indicates the name and license number of the facility and other pertinent information.

(b) A gate shall be provided at the entrance, to be kept locked when the facility is not open for business.

(c) The facility and material handling area shall be surrounded by an opaque fence, at least 8 feet in height. Portions of this requirement may be waived if the department deems that screening is impractical or that natural screening is satisfactory.

(d) Open burning is prohibited except as provided by NR 154.10.

(e) Handling and disposal of toxic or hazardous, chemical, or liquid wastes shall be in accordance with NR 151.08 (4) and (5), and NR 151.12 (5) (f) and (7).

(f) All other solid wastes intended for land disposal or other means of disposal shall be handled in accordance with NR 151.08 and NR 151.12.

(5) Any person, who maintains or operates a scrap metal processing facility or who permits use of property for such, when the facility is terminated, shall terminate the facility by removing all salvageable material within a time period specified by the department, which shall be no greater than 120 days.

The foregoing rules were approved and adopted by the State of Wisconsin Natural Resources Board on January 17, 1974.

The rules contained herein shall take effect upon publication.

Dated at Madison, Wisconsin February 7, 1974.

STATE OF WISCONSIN DEPARTMENT OF NATURAL RESOURCES
