Analysis Prepared by the Department of Health and Social Services

Chapter 168 of the Laws of 1975 revised the state pharmacy statutes by amending the drug anti-substitution law. The change permitted a pharmacist to select a drug product equivalent from a list created by the Department, and to dispense this product in place of a brand name product indicated on a prescription. The list is the Wisconsin Drug Formulary which is created with the advice of the Drug Quality Council appointed by the Governor. The first edition of the Formulary appeared in October 1976; it has been revised five times since then.

Eight generic drugs are added to the Wisconsin Drug Formulary, Chapter HSS 127 of the Wisconsin Administrative Code, by this order. This revision of the Formulary seeks to increase the scope and use of the Formulary by increasing the number of drugs available for substitution. These additions will save money for individual and institutional purchasers of pharmaceuticals.

The Drug Quality Council recommended that the Department add these drugs to the Formulary following public meetings at which representatives of manufacturers were invited to voice their comments. On the basis of a review of comparative data and manufacturing information, the Council selected the drug products that can be safely interchanged.

Pursuant to authority vested in the Department of Health and Social Services by ss. 140.05 (3) and 140.90, Stats., the Department of Health and Social Services hereby amends and adopts rules interpreting ss. 140.90 and 450.075, Stats., as follows:
