Summary of, and comparison with, existing or proposed federal regulations:

Because education in the United States is typically governed by each state and local government, federal regulations are generally silent with respect to teacher licensure. As a result, the requirements for teacher licensure vary by state.

Comparison with rules in adjacent states:

- **Illinois** (Illinois Compiled Statutes 105 ILCS 5/21B-5): The Illinois State Board of Education expects all of its certified teachers to complete a state-approved teacher preparation program and have at least a bachelor's degree. While the minimum degree requirement for Illinois teachers is a bachelor's degree, some of these programs are at the graduate level. License applicants graduated from an out-of-state teacher preparation program are recognized by the Illinois Department of Education if it has been approved by that state's Department of Education, or if it leads to a teaching certificate or license in that state. License applicants who graduated from a foreign college or university must have their foreign credentials evaluated and converted to fit the American credits/courses standard to receive licensure.

- **Iowa** (Iowa Administrative Code Chapter 282.13): The Iowa Board of Educational Examiners requires that, in order to be eligible for a teaching license in Iowa, graduates from Iowa institutions must meet the following requirements: 1) A baccalaureate degree from a regionally-accredited institution; 2) Completion of a state-approved teacher preparation program in Iowa, including the required assessments; and 3) Recommendation for licensure from the designated recommending official where the program was completed. Graduates from out-of-state institutions must meet the following requirements: 1) A baccalaureate degree from a regionally-accredited institution; 2) completion of a state-approved teacher preparation program, including the coursework requirements for a content area teaching endorsement, coursework in pedagogy, and a student teaching or internship placement, completed for college semester credit through a regionally-accredited institution; 3) Recommendation for licensure from the designated recommending official where the program was completed; 4) Valid or expired license from another state; and 5) Completion of the required Iowa assessments (not required if the applicant completed their teacher preparation program prior to January 1, 2013, or if the applicant has three years or more teaching experience on a valid license in another state). Applicants who have completed certain nontraditional programs may or may not be eligible for licensure in Iowa.

- **Michigan** (Michigan Administrative Code Section R 390.1101-390.1216): The Michigan Department of Education Office of Professional Preparation Services requires that applicants pursuing certification via a traditional route should hold a bachelor's degree, complete a state-approved teacher preparation program, and earn passing scores on the state-required tests. The traditional route to certification leads to the issuance of a provisional certificate, Michigan's initial teaching certificate for new teachers. After successfully completing three years of teaching experience and continuing education, those holding an initial certificate may upgrade to a Professional Education Certificate. Highly effective and qualified teachers may then move up to the third tier of certification, the Advance Professional Education Certificate. Provisional and interim certificates to teach are available for applicants who are pursuing alternative pathways to licensure.

- **Minnesota** (Minnesota Administrative Rules Chapter 8710): The Minnesota Board of Teaching requires all applicants for teacher licensure in the state to graduate from a state-approved teacher preparation program and hold a minimum of a bachelor's degree, as well as demonstrated completion of a human relations course, which is included in all Minnesota approved teacher preparation programs. Teacher preparation programs completed outside of Minnesota may count if the program is equivalent to that of an approved Minnesota teacher preparation program. If the applicant did not complete a teacher preparation program in one of the states with a reciprocal licensing agreement, the applicant must also complete an approved human relations course in order to be licensed in the state. Applicants who have completed an online teacher preparation program will be recognized as long as the program is regionally accredited, approved by the state in which it is offered, be a field for which Minnesota offers licenses, and include a supervised practicum and student teaching. Graduates of foreign teacher preparation programs must have their credits evaluated by a member agency of the National Association of Credential Evaluation Services.

Summary of factual data and analytical methodologies:

The Department recently promulgated a rule revising PI 34 of the Wisconsin Administrative Code, Clearinghouse Rule 17-093 relating to stakeholder workgroups revisions to licensure, which became effective August 1, 2018. Upon further review, the Department has identified further points of clarification within the rule. Without a rule change, the Department will be required to implement rules for educator licensure as they currently exist in PI 34; applicants for specific licenses may face unclear guidance on license requirements as a result.
