

(e) By order of the secretary of the interior, the state of Wisconsin is permitted to harvest a total of 11,000 Canada geese in the area described in subsection WCD 10.01 (1) (a) and (b). To exceed the allowable quota established by the department of the interior in any of the states in the Mississippi flyway in which such quota has been established will reduce the numbers of Canada geese in the Great Lakes flock of the Mississippi flyway below the number determined by the flyway states as the minimum level of the flock. The Wisconsin conservation commission also recognizes that certain conditions with respect to the flock and its available food supply, both on and off the refuge, may exist at the time the state harvest quota is reached which may create a depredation problem to agricultural crops in the area surrounding the refuge if gunning pressure is removed by closing the season on such lands thereby encouraging the flock to feed over a much wider area than the refuge proper. It is, therefore, the intent of the conservation commission to maintain an open season for Canada geese for as long a period as possible to provide the maximum hunting opportunity and to reduce agricultural depredations to a minimum. The conservation director is, therefore, authorized to take any of, or any combination of, or all of the following actions by emergency order, as provided in section 227.027, Wis. Stats., to resolve these problems in the best interest of the state of Wisconsin:

1. To close the open season for hunting geese in the area described in section WCD 10.01 (1) (a) and (b) when the conservation director determines that the harvest of geese in such area has reached the prescribed quota and that conditions do not exist for goose damage to ordinary feeding areas and for widespread depredations to agricultural crops if the season is closed; or

2. If conditions are such that the food conditions and flock size may reasonably be expected to result in goose damage to ordinary feeding areas and in crop depredations over a larger area as a result of closing the season at the time the total harvest has reached the figure specified in section WCD 10.01 (1) (e), to close the open season for hunting geese in the area described in section WCD 10.01 (1) (a) and (b) when the conservation director determines such conditions cease to exist, or to close the open season for hunting geese when such season is closed by order of the secretary of the interior, whichever date comes first; or

3. To advance the daily opening shooting hours for waterfowl to an earlier hour in the area described in section WCD 10.01 (1) (a) when the conservation director determines the average daily rate of kill of Canada geese in the area described in section WCD 10.01 (1) (a) and (b) has fallen below the minimum number determined necessary to achieve the harvest of the state quota established for such area during the open season for geese established in section WCD 10.01 (1) (a). Factors to be included in the determination of the minimum average daily rate of kill are: the number of days in the open season; the food and water conditions and available rest area on the refuge; the total number of Canada geese using the refuge; the weather; and the amount of food available off the refuge; or

4. To restrict the open season for hunting waterfowl to odd numbered days of the month in the area described in section WCD 10.01 (1) (a) when the conservation director determines the average daily rate of kill of Canada geese in the area described in section WCD 10.01 (1) (a) and (b) has risen above the maximum number determined necessary to maintain an open season for hunting Canada geese for the period necessary to provide maximum hunting opportunity and to reduce agricultural depredations to a minimum. Factors to be included in the determination of the maximum average daily rate of kill are: the ratio of days of open season to date to the days of open season possible; the total number of Canada geese using the refuge; the food conditions on the refuge; the progress of agricultural crop harvest and depredation potential off the refuge.

Said representatives shall inspect the pelt and attach and lock a special tag indicating it has been inspected. It shall be unlawful for any person to possess raw pelts from such animals beginning six days after the close of the season to the opening date of the following season without such tag attached and locked.
