WCD 10.01 Open and closed seasons. A closed season is established for each species of wild animal and bird named herein extending during all the time of each year except the open season period embraced within the specified dates both inclusive. Such open season shall apply to all of the area described in each locality except as otherwise provided in Wis. Adm. Code chapters WCD 11 and WCD 15. Except as otherwise expressly provided, no person shall take, catch, kill, hunt, pursue, shoot, or trap any wild animal or bird at any time other than the open season and the established hunting hours therefor, nor in the open season in excess of the daily bag limit designated for each species, nor have any such protected wild animal or bird in his possession or under his control in excess of the possession limit. Whenever open and closed seasons are defined by highways, the boundary shall be the center line of the highway except as otherwise provided.

(f) By order of the secretary of the interior, the state of Wisconsin is permitted to harvest a total of 14,000 Canada geese. To exceed the allowable quota established by the department of the interior in any of the states in the Mississippi flyway in which such quota has been established will reduce the numbers of Canada geese in the Great Lakes flock of the Mississippi flyway below the number determined by the flyway states as the minimum level of the flock. The Wisconsin conservation commission also recognizes that certain conditions with respect to the flock and its available food supply, both on and off refuge areas, may exist at the time the state harvest quota is reached which may create a depredation problem to agricultural crops in the area surrounding Canada geese concentrations if gunning pressure is removed by closing the season on such lands thereby encouraging the flock to feed over a much wider area than the refuge proper. It is, therefore, the intent of the conservation commission to maintain an open season for Canada geese for as long a period as possible to provide the maximum hunting opportunity and to reduce agricultural depredations to a minimum. The conservation director is, therefore, authorized to take either of the following actions by emergency order, as provided in section 227.027, Wis. Stats., to resolve these problems in the best interest of the state of Wisconsin.

1. If conditions are such that the food conditions and flock size may reasonably be expected to result in goose damage to ordinary feeding areas and in crop depredations over a larger area as a result of closing the season at the time the total harvest has reached the figure specified in Wis. Adm. Code section WCD 10.01 (1) (f) to close the open season for hunting geese in the state or in any part thereof when the conservation director determines such conditions cease to exist, or to close the open season for hunting geese when such season is closed by order of the secretary of the interior, whichever comes first.

(b) This subsection shall not be construed to apply to propagating, scientific or other operations in accordance with the terms of lawfully issued state and federal permits, or to the taking of birds over salt blocks, properly shocked corn, standing crops (including aquatics), grains found scattered solely as a result of normal agricultural practices, flooded standing crops or flooded harvested crop lands, or to the feeding of migratory game birds at any time not in connection with hunting.
