

Chapter HFS 116

APPENDIX A

EXCLUSION LIST OF CONDITIONS THAT ARE NOT REPORTABLE*

List of isolated defects considered normal variants when found in isolation

Accessory auricle (drop ear tags)	Mongolian spots
Accessory nipple (supernumerary nipple, or skin tag)	Nasal lacrimal duct obstruction
Cervical rib	Natal teeth
Clinodactyly (incurving of 5th finger)	Overriding sutures
Cryptorchidism (see undescended testicle)	Phimosis
Diastasis recti	Polydactyly in blacks (Postaxial, Type B)
Epicanthal folds	Posteriorly rotated ears
Esotropia	Rectal fissures
Flammeus nevus	Redundant foreskin
Flat bridge of nose	Single umbilical artery
Fontanelle (large or small)	Syndactyly of 2nd and 3rd toe
Gum cysts, including congenital epulis, ranula, mucocele	Thymic hypertrophy
Hemangioma	Tibial torsion
Hemolytic disease of the newborn (RH disease)	Tongue tie
Hydroceles	Umbilical cord atrophy
Hymenal tags	Umbilical hernias (completely covered by skin)
Hypoplastic scrotum (if birth weight is less than 2,500 grams)	Undescended testicle or cryptorchidism if birth weight is less than 2,500 grams
Incurving fingers (clinodactyly)	Vaginal cysts
Long fingers and toes	Vaginal tags
Low set ears	Webbing of neck
Meckel's diverticulum	Widely spaced nipples

*This list is based on the list of exclusions developed by the Centers for Disease Control and Prevention for the Metropolitan Atlanta Congenital Defect Program, as found in Birth Defects Branch Six Digit Code published by the Centers for Disease Control and Prevention, Atlanta, GA 30333.
