Subchapter III — Managed Forest Land

NR 46.15 Definitions. For terms used in this subchapter, the following definitions apply:

(1) "Building" means a permanent structure having a roof supported by posts, columns or walls.

(2) "Capable of producing 20 cubic feet of merchantable timber per acre per year" means land determined capable of such production according to normal yield tables published by the North Central Forest Experiment Station and the Lake States Forest Experiment Station and meeting one of the following size and minimum density classifications:

Stand Size Classes	Tree Diameter Ranges at 4.5 Feet From Ground Level	Minimum Density
Seedlings	0"-1"	200 trees per acre
Saplings	1"-5"	100 trees per acre
Poletimber	5"-9"*-11"***	3 cords per acre
Sawtimber	9"+*, 11"***	1,300 board feet per acre

*For conifer species

**For other species

Note: Copies of normal yield tables are available for review at the Department of Natural Resources, 101 South Webster St., Box 7921, Madison, WI 53707.

(2m) "Certified plan writer" means a person certified by the department under s. NR 46.165.

(3) "Commercial logging operation" means the cutting of forest products in accordance with the department approved management plan, under a written contract or by employees of the owner, during a specified time period.

(3m) "Consideration" means a benefit to the promisor or a detriment to the promisee, including the receipt of cash, goods, or in-kind services. Consideration does not include payments received from a governmental body or non-profit organization where the purpose of the payment is to provide public access for a recreational activity.

Note: This definition clarifies the legislative intent of 2007 Wisconsin Act 20 which prohibits receiving consideration for recreation on MFL land. The definition of "consideration" is not meant to prohibit landowners, neighbors, and friends from assisting each other in property management activities, such as clearing and maintaining fences, watching each other's properties, or sharing land management activities (such as conducting timber stand and wildlife habitat improvement projects where several parties could collectively supply the proper equipment). The definition of "consideration" is also not meant to prohibit hunters and other recreational users from thanking landowners for recreating on their lands or providing a gift for the use of the land, as long as the gift is reasonable and given freely. DNR encourages friendly hunter-landowner relationships. The definition of "consideration" is meant to prevent landowners from requiring cash, goods, and services from recreational users as a condition for using lands under the MFL program for recreational uses. In other words, landowners are prohibited from requiring that a recreational user pay cash (for example pay a lease on non-MFL lands, a hunting lodge or cabin, vehicle parking space, or making a donation to a charity or fund raiser), provide a material good (for example an ATV, culvert, gravel, television, or any other household or non-household item), or provide a service (for example shingle and put siding on a house, build a wildlife pond, restore an antique automobile, bail hay or harvest grain, etc.) as a condition for permitting recreation on their MFL land.

(4) "Contiguous" means in actual contact with or touching at some point.

(5) "Correction order" means an order of the department to correct a previously issued managed forest land order.

(6) "Cover type" means vegetation of a predominant species or group of species, or, if timber, by predominant species or group of species, size and density, which is an area 2 acres or more in size.

(8) "Developed for commercial recreation" means the alteration of the land or its features or the addition of improvements which impede, interfere with or prevent the practice of forestry.

(9) "Developed for human residence" means land that contains a building for habitation that is constructed or used as a domicile or that has a minimum of 5 of the following 8 characteristics:

(a) 800 sq. ft. or more in total area, using exterior dimensions of living space, including each level and not including porches, decks or uninsulated screen porches.

(b) Indoor plumbing including water and sewer, piped to either municipal or septic system.

(c) Central heating or cooling, including electric heat, a furnace or heat with a circulation system.

(d) Full or partial basement, excluding crawl spaces and frost walls.

Note: "Developed for human residence" is not meant to include storage or workshop buildings. If there is living space as part of such buildings, the living space will be compared against the 8 characteristics.

(10) "Developed for industry" means the alteration or use of the land for the purpose of conducting trade, production or manufacturing activities other than forest products production.

(11) "Developed for use incompatible with the practice of forestry" means the alteration or use of the land for any purpose which impedes, interferes with or prevents the practice of forestry.

Note: This definition does not prevent activities authorized in a department approved management plan.

(12) "Domicile" means a place of permanent residence evidenced by voting, personal income tax or driver's license records.

(13) "Encumbrance" has the meaning specified in s. 409.102 (1) (hs), Stats.

(14) "Farmland" means former agricultural land lying idle and presently not producing 20 cubic feet of merchantable timber per acre per year.

Note: Active agricultural land is not eligible for entry as it is an incompatible use.

(3) MERCHANTABLE TIMBER. For the purpose of calculating the 5% stumpage value alternative for the withdrawal tax under s. 77.88 (5) (a) 2. and (b) 2., Stats., timber shall be considered merchantable if the department determines it is:

(a) Of size, quality and species to meet commonly accepted industry standards for a specific timber product,
