

**ASSEMBLY SUBSTITUTE AMENDMENT 1,  
TO 1995 ASSEMBLY BILL 585**

November 8, 1995 – Offered by COMMITTEE ON NATURAL RESOURCES.

1     **AN ACT to renumber** 29.092 (10); **to amend** 29.092 (10) (title), 29.093 (10) (b),  
2             29.415 (1), 29.415 (4) (intro.) and 29.415 (6) (a); and **to create** 20.370 (1) (ft),  
3             29.092 (10) (b), 29.415 (2) (am), 29.415 (2) (bn), 29.415 (6m) and 29.415 (6r) of  
4             the statutes; **relating to:** incidental takings of wild animals and wild plants of  
5             endangered species or threatened species and making an appropriation.

***The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:***

6             **SECTION 1.** 20.370 (1) (ft) of the statutes is created to read:

7             20.370 (1) (ft) *Endangered resources — application fees.* All moneys received  
8             from application fees under s. 29.092 (10) (b) to be used for the purposes of processing  
9             applications under and administering s. 29.415 (6m) and (6r).

10            **SECTION 2.** 29.092 (10) (title) of the statutes is amended to read:

11            29.092 (10) (title) SCIENTIFIC COLLECTOR PERMIT; ENDANGERED SPECIES PERMIT.

12            **SECTION 3.** 29.092 (10) of the statutes is renumbered 29.092 (10) (a).

13            **SECTION 4.** 29.092 (10) (b) of the statutes is created to read:

1           29.092 (10) (b) The nonrefundable application fee for a permit issued under s.  
2 29.415 (6m) is \$100.

3           **SECTION 5.** 29.093 (10) (b) of the statutes is amended to read:

4           29.093 (10) (b) *Endangered species permit.* A permit issued under s. 29.415 (6)  
5 or (6m) is valid for the period designated by the department.

6           **SECTION 6.** 29.415 (1) of the statutes is amended to read:

7           29.415 (1) PURPOSE. The legislature finds that certain wild animals and wild  
8 plants are endangered or threatened and are entitled to preservation and protection  
9 as a matter of general state concern. The federal endangered species act of 1973 and  
10 the Lacey act together provide for the protection of wild animals and wild plants  
11 threatened with worldwide extinction by prohibiting the importation of endangered  
12 or threatened wild animals and wild plants and by restricting and regulating  
13 interstate and foreign commerce in wild animals and wild plants taken in violation  
14 of state, federal and foreign laws. The states, however, must also assume their  
15 responsibility for conserving these wild animals and wild plants and for restricting  
16 the taking, possession, transportation, processing or sale of endangered or  
17 threatened wild animals and wild plants within their respective jurisdictions to  
18 assure their continued survival and propagation for the aesthetic, recreational and  
19 scientific purposes of future generations. The legislature finds that by ~~eliminating~~  
20 restricting the taking, possession or marketing of endangered species in this state  
21 and by establishing a program for conservation and restoration of these endangered  
22 or threatened species, their potential for continued existence will be strengthened.  
23 The legislature further finds that the activities of both individual persons and  
24 governmental agencies are tending to destroy the few remaining whole  
25 plant-animal communities in this state. Since these communities represent the only

1 standard against which the effects of change can be measured, their preservation is  
2 of highest importance, and the legislature urges all persons and agencies to fully  
3 consider all decisions in this light.

4 **SECTION 7.** 29.415 (2) (am) of the statutes is created to read:

5 29.415 (2) (am) "State agency" means a board, commission, committee,  
6 department or office in the state government. "State agency" does not include the  
7 department of natural resources or the office of the governor.

8 **SECTION 8.** 29.415 (2) (bn) of the statutes is created to read:

9 29.415 (2) (bn) "Whole plant-animal community" means a group of species  
10 living together in a particular area, time and habitat.

11 **SECTION 9.** 29.415 (4) (intro.) of the statutes is amended to read:

12 29.415 (4) (intro.) Except as provided in sub. (6r) or as permitted by  
13 departmental rule or permit:

14 **SECTION 10.** 29.415 (6) (a) of the statutes is amended to read:

15 29.415 (6) (a) The department shall issue a permit, under such terms and  
16 conditions as it may prescribe by rule, authorizing the taking, exportation,  
17 transportation or possession of any wild animal or wild plant on the list of  
18 endangered and threatened species for zoological, educational or scientific purposes,  
19 for propagation of such wild animals and wild plants in captivity for preservation  
20 purposes, unless such exportation, possession, transportation or taking is prohibited  
21 by any federal law or regulation, or any other law of this state.

22 **SECTION 11.** 29.415 (6m) of the statutes is created to read:

23 29.415 (6m) INCIDENTAL TAKINGS; PERMITS. (a) In this subsection, "taking"  
24 means an activity prohibited under sub. (4) (a), (b) or (c).

1 (b) The department may issue a permit, under such terms and conditions as  
2 it may prescribe, authorizing a taking that otherwise is prohibited by this section if  
3 the taking is not for the purpose of, but will be only incidental to, the carrying out  
4 of an otherwise lawful activity.

5 (c) The department may not issue a permit under this subsection unless an  
6 applicant for the permit submits to the department a conservation plan and an  
7 implementing agreement. The conservation plan shall include all of the following:

8 1. A description of the impact that will likely occur as a result of the taking of  
9 an endangered species or threatened species that is specified on the department's  
10 endangered and threatened species list.

11 2. The steps that the parties specified under par. (d) will take to minimize and  
12 mitigate the impact that the endangered species or the threatened species will suffer.

13 3. A description of the funding that the parties specified under par. (d) will have  
14 available to implement the steps specified under subd. 2.

15 4. A description of the alternative actions to the taking that the parties in par.  
16 (d) have considered and the reasons that these alternatives will not be utilized.

17 5. Any other measures that the department may determine to be necessary or  
18 appropriate.

19 (d) The implementing agreement required under par. (c) shall specifically  
20 name, and describe the obligations and responsibilities of, all the parties that will  
21 be involved in the taking as authorized by the permit.

22 (e) Upon receipt of an application for a permit and the accompanying  
23 conservation plan and implementing agreement for a proposed taking, the  
24 department shall publicize the application by announcing the application receipt  
25 and by giving a brief description of the proposed taking. The publicity shall be

1 distributed to the news media in the vicinity of the proposed taking. The department  
2 shall establish a procedure for receipt of public comment on the proposed taking.

3 (f) After having considered the public comment received on the proposed  
4 taking, the department shall issue the permit if the department finds, based on the  
5 permit application, the conservation plan and the implementing agreement, the  
6 taking will meet all of the following requirements:

7 1. The taking will not be the purpose of, but will be only incidental to, the  
8 carrying out of a lawful activity.

9 2. The parties specified under par. (d) will, to the maximum extent practicable,  
10 minimize and mitigate the impact caused by the taking.

11 3. The parties specified under par. (d) will ensure that adequate funding for the  
12 conservation plan will be provided.

13 4. The taking will not appreciably reduce the likelihood of the survival or  
14 recovery of the endangered species or threatened species within the state, the whole  
15 plant-animal community of which it is a part or the habitat that is critical to its  
16 existence.

17 5. Any measures required under par. (c) 5. will be met.

18 (g) The department may require that a party specified under par. (d) make  
19 additional assurances that the requirements under par. (f) 1. to 5. will be met before  
20 issuing a permit under par. (f).

21 (h) The department shall impose on the permit any terms or conditions that the  
22 department finds necessary to ensure that the requirements under par. (f) 1. to 5. will  
23 be met. These terms or conditions may include reporting and monitoring  
24 requirements.

1 (i) The department shall revoke a permit issued under this subsection if it finds  
2 that a party specified under par. (d) fails to comply with the terms and conditions of  
3 the permit.

4 (j) A permit issued by the department is not required if a permit under 16 USC  
5 1539 has been issued and the department determines that that the federal permit,  
6 along with its conservation plan and implementing agreement, comply with the  
7 requirements under this subsection.

8 (k) This subsection does not apply to interagency activities under sub. (6r).

9 **SECTION 12.** 29.415 (6r) of the statutes is created to read:

10 29.415 (6r) INTERAGENCY CONSULTATION. (a) A state agency shall notify the  
11 department at the earliest opportunity of the location, nature and extent of a  
12 proposed activity that the state agency may conduct, approve or fund and that may  
13 affect an endangered species or threatened species. The department may allow the  
14 taking, exportation, transportation or possession of an endangered species or  
15 threatened species if all of the following apply:

16 1. The activity is accomplished in accordance with interagency consultation  
17 procedures established by the department and the state agency for the purpose of  
18 minimizing any adverse effect on the endangered species or threatened species.

19 2. The activity is not likely to jeopardize the continued existence and recovery  
20 of the endangered species or threatened species, or the whole plant-animal  
21 community of which it is a part, within this state and the activity is not likely to result  
22 in the destruction or adverse modification of a habitat that is critical to the continued  
23 existence of the endangered species or the threatened species within the state, as  
24 determined by the department under par. (b).

25 3. The benefit to public health, safety or welfare justifies the activity.

1           (b) For purposes of par. (a) 2., the department shall determine whether a  
2           habitat is critical to the continued existence of an endangered species or threatened  
3           species by considering the endangered species' or threatened species' global and  
4           state element ranking as defined by the methodology used by the natural heritage  
5           inventory program.

6           (c) The department shall notify the state agency if the department determines  
7           that there is reasonable cause for the department to determine that an activity is not  
8           being carried out in compliance with this subsection or with any environmental  
9           protection requirements developed through interagency consultation procedures. If  
10          the secretary of natural resources and the head, as defined in s. 15.01 (8), of the state  
11          agency are unable to agree upon methods or time schedules to be used to correct the  
12          alleged noncompliance, the department may bring any action or initiate any other  
13          proceedings to enforce compliance with this subsection.

14          (d) The department and the state agency shall exchange information and  
15          cooperate in the planning and implementation of any activity relating to the taking,  
16          exportation, transportation or possession of any endangered species or threatened  
17          species in order to alleviate, to the extent practicable under the circumstances, any  
18          potential adverse effect on the endangered species or the threatened species.

19          (e) Cooperation between the department and the state agency under par. (d)  
20          may include conducting reasonable surveys upon the request of the department,  
21          unless the department determines that the requirements of public health, safety or  
22          welfare outweigh the need for the surveys.
