Analysis by the Legislative Reference Bureau

Under current law, pharmacists licensed in the state are held to certain practice standards, and any pharmacist who fails to meet the practice standards may be required to forfeit not less than \$25 nor more than \$50 for each offense, and may be subject to disciplinary action. Disciplinary action may include a reprimand, a denial, limitation, suspension or revocation of the pharmacist's license, and a forfeiture of not more than \$1000 for each offense. This substitute amendment requires all pharmacists licensed in the state to administer, distribute, and dispense all contraceptives that are approved by the federal Food and Drug Administration (FDA), unless the contraceptive is contraindicated for a particular patient.

Also, the substitute amendment alters the definition of “abortion” under certain provisions in current law. Under the substitute amendment, “abortion” excludes any form of birth control that is approved by the FDA.
