

**WISCONSIN LEGISLATIVE COUNCIL
AMENDMENT MEMO**

2003 Senate Bill 155	Assembly Amendment 1
<i>Memo published:</i> March 12, 2004	<i>Contact:</i> Dan Schmidt, Analyst (267-7251)

Current law directs the Department of Administration (DOA) to require all state employees to utilize gasohol or other alternative fuel for the operation of state-owned or state-leased vehicles to the extent that such utilization is feasible.

2003 Senate Bill 155 directs DOA to require state employees to utilize hybrid-electric vehicles for the operation of state-owned or state-leased vehicles, as feasible, in addition to vehicles that operate on gasohol or other alternative fuels.

Assembly Amendment 1 amends the bill to prohibit DOA from leasing or purchasing or authorizing the lease or purchase of any hybrid-electric vehicle unless the manufacturer certifies to DOA that the final assembly of the vehicle occurred in the United States.

Assembly Amendment 1 was adopted by a voice vote of the Assembly and 2003 Assembly Bill 417 was concurred in by the Assembly, as amended, by a voice vote on February 24, 2004.
