### *Analysis by the Legislative Reference Bureau*

Under current law, with certain exceptions, a person may not engage in the practice of professional geology, hydrology or soil science, unless he or she is licensed by the examining board of professional geologists, hydrologists and soil scientists.

This bill creates an additional exception from the licensing requirement for a person who is registered as wetland scientist by the department of regulation and licensing (DORL) and who is engaged in certain activities related to wetlands, including monitoring, delineation, permitting and designing wetland restoration projects or projects to mitigate adverse impacts to wetlands. The bill requires DORL to register as a wetland scientist a person who pays a registration fee and who is certified, registered or accredited as a wetland scientist by a state or national private or professional organization that certifies, registers or accredits wetland scientists and that is recognized by DORL.

A person who is registered as a wetland scientist under the bill must notify DORL if the national organization revokes the person's certification, registration or accreditation, in which case DORL must revoke the person's registration as a wetland scientist.
