Analysis by the Legislative Reference Bureau

This bill makes several changes in the laws governing public inland lake protection and rehabilitation districts (lake districts). These changes include:

1. Removing one of the conditions that a county board must consider when determining if a lake district will be established. Currently, the county board, in response to a petition for the establishment of a lake district, may after a hearing and committee deliberations create a lake district if the county board finds that the petition and proposed lake district meet a number of conditions. One of those conditions is that the establishment of the proposed district will not cause or contribute to long-range environmental pollution. This bill removes that condition from the county board's consideration.

SENATE BILL 440

2. Adding to the duties of the board of commissioners of the lake district the scheduling of the district's annual meeting and the preparing of the annual budget for presentation at the annual meeting of the lake district.

3. Requiring the proposed annual budget to include existing indebtedness, revenues and expenditures from the previous year, and estimated revenues and expenditures for the current year.

4. Requiring the secretary of the board of commissioners to prepare and send notices of the annual meeting, any special meeting, and meetings of the board.

5. Specifying what has to be included in the notice of the annual meeting, including the proposed annual budget and a list of items for consideration at that meeting.

6. Specifying that no absentee ballots or proxies are permitted at the annual meeting.

7. Allowing the electors and property owners at the annual meeting to consider and vote on amendments to the annual budget.

8. Limiting the amount of special charges for services provided to members of the lake district to not more than \$2.50 per \$1,000 of assessed valuation.

The bill also allows the Department of Natural Resources to enter into contracts with public and private persons to create and support a statewide lake monitoring network that will include the training and equipment necessary for water quality sampling, laboratory analysis of water samples, and the creation of a statewide database regarding water quality.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
