Analysis by the Legislative Reference Bureau

This bill requires the Public Service Commission to require retail electric utilities and cooperatives to survey customers and members about broadband service availability and reimburse the utilities and cooperatives for conducting the surveys. The bill also requires the PSC to require Internet service providers to disclose to the PSC the properties they serve and the average minimum download and upload speeds at which they provide residential and business service to those properties. The PSC must use the survey results and information disclosed to improve broadband mapping.

The bill also provides a supplemental appropriation for the broadband expansion grant program administered by the PSC. Under current law, the PSC awards grants for constructing broadband infrastructure in underserved areas designated by the PSC.
