### *Analysis by the Legislative Reference Bureau*

This bill requires the Board of Regents of the University of Wisconsin System and the Technical College System Board to implement a universal course numbering and credit transfer system within five years. The bill also eliminates a restriction on the respective educational roles of the UWS and TCS.

Under current law, one of the purposes of the TCS is to provide a collegiate transfer program, but collegiate transfer programs may not comprise more than 25 percent of the approved credit hours offered in any technical college district. A “collegiate transfer program” is a full-time program, approved by the TCS Board, in which the credits earned may be transferable to a four-year institution of higher education. The TCS Board, in agreement with the Board of Regents, may designate courses as transferable for collegiate credit between the two systems. The Board of

**SENATE BILL 342**

Regents must establish policies for the appropriate transfer of credits between UWS institutions and may establish policies for the appropriate transfer of credits with other educational institutions, including technical colleges. In addition, the Board of Regents and the TCS Board must enter into an agreement identifying at least 30 credits of core general education courses that are transferable between the UWS and TCS. Private colleges and tribal colleges may also participate in this agreement related to course credit transfers. The Board of Regents must further establish and maintain a computer-based credit transfer system.

This bill requires the Board of Regents and the TCS Board to implement a universal course numbering and credit transfer system under which credits for courses with the same universal course number are automatically transferable among UWS institutions and technical colleges. If a UWS institution or technical college offers a course, the UWS institution or technical college must award academic credit to a student who successfully completes a course with the same universal course number at any other UWS institution or technical college and the course credit awarded must be applied toward degree requirements, as applicable.

This bill also eliminates the following prohibitions relating to the respective educational roles of the UWS and the TCS: 1) that the Board of Regents not broaden the UWS's mission to include training for semiprofessional or skilled-trade occupations beyond that offered during the 1972-73 academic year unless the TCS Board approves; and 2) that the TCS Board not broaden TCS collegiate transfer program offerings beyond those in existence during the 1972-73 academic year unless the Board of Regents approves.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
