### *Analysis by the Legislative Reference Bureau*

This bill requires the school board of a school district to notify certain interested parties, including members of the community, prior to commencing a construction project. The notice requirement applies to a construction project with an estimated cost of \$10,000 or greater that will occur in a school building in which pupils, teachers, and administrators will be present. With certain exceptions, the school board must provide notice at least two months prior to the start date. Notice may be provided by mail, by publication in a newspaper likely to give notice to interested persons, or at a public hearing. Notice to parents and guardians of pupils and others who are assigned to the school building may be provided by e-mail or through a letter sent home with the interested party.
